### PROFILE

Enthusiastic and fast-learning Junior Java Developer with a solid understanding of Java fundamentals, object-oriented programming, and web application development. Skilled in building RESTful APIs using Spring Boot and working with databases such as MySQL. Familiar with frontend technologies including React, HTML, and CSS, enabling full-stack development capabilities. Eager to contribute to real-world projects and continuously improve as a developer in a dynamic team environment.

### WORK EXPERIENCE

- Projects
- (1)Employee Management System
- Tech stack: Java, Spring Boot, MySQL, React, HTML/CSS
- Built a full-stack CRUD web application to manage employee data.
- Developed RESTful APIs using Spring Boot and connected them to a MySQL database.
- Created a user-friendly frontend with React, styled using HTML and CSS.
- Implemented features such as adding, updating, deleting, and listing employees.
- (2)Online Book Store (Personal Project)
- Tech stack: Java, Spring Boot, H2 Database, React
- Designed and implemented a backend service to manage books, users, and orders.
- Integrated frontend and backend using REST APIs.
- Practiced form handling, routing, and component-based development in React.
